

CASE STUDY: FLEETWOOD PARK 334 W MAIN ST, FLEETWOOD, PA 19522

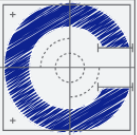

Dependable

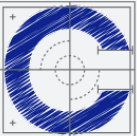

Experience

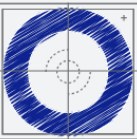

Safety

Caring People

Communication & Collaboration

Outstanding Service

Fleetwood Park holds a special place in the hearts of many Fleetwood residents. During the height of the COVID-19 pandemic, the park's pedestrian bridge was destroyed by storms, and the original bandshell, built in 1986, was condemned due to risk of collapse. Fleetwood Borough spent several years securing funds to replace the bridge and bandshell and, thanks to the unwavering efforts of many, the replacement of both structures was completed in 2023 by DESCOCO Design and Construction.

Whereas the original structures had a history that cannot be replicated, DESCOCO built a new pedestrian bridge and bandshell that comply with ADA regulations and are designed to resist damage from the elements. In addition, the creek bed was tapered and large rocks were installed to prevent future flood damage to the park's structures. This means the Fleetwood community can utilize the new pedestrian bridge and bandshell for many years to come.

DESCOCO was honored to attend the ribbon cutting for Fleetwood Park's new bridge and bandshell on May 11, 2023.

Pre-Construction Services:

- Project Planning and Coordination

Construction Services:

- Demolition of Preexisting Bridge and Bandshell
- Install New Bandshell Foundation and Stage Concrete
- Erect Bandshell Structure
- Install Deep Bridge Foundations and Pedestrian Bridge
- Landscape and Pave
