Caring People

Communication & Collaboration

Outstanding Service

The focus of the Lancaster Brethren in Christ Church's Family Life Center addition project was to provide a full-size gymnasium with a balcony as well as a commercial kitchen. This would allow the church to host large gatherings and events, while giving them the capability of food service.

The addition project included multiple Geo-thermal heating and cooling systems, automatic sprinkler system, and complete fire alarm system with Voice Evac System.

The brick for the addition matched the existing structure perfectly and the addition was designed to look like it had always been a part of the main structure.

Pre-Construction Services

- Design Services
- Project Budgeting & Scheduling
- MEP Design & Engineering
